Learning Outcome: 90% of participants will report that participation in the program enhanced their knowledge of health inequities associated with GLP-1 RA drugs.

Successful completion of the nursing continuing professional development hours awarded requires participants to attend the entire program and complete an evaluation form. Certificates will be issued upon receipt of a completed evaluation.

This activity has been submitted to the New Jersey State Nurses Association for approval to award contact hours. The New Jersey State Nurses Association is accredited as an approver of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation.
